JOHN BUSSE

phone (775)770-4311 **email** itsjohnabusse@gmail.com **portfolio** john-busse.github.io/ **in** linkedin.com/in/j-a-busse/

SUMMARY

Versatile programmer and designer with experience developing game projects in Unreal Engine, Unity, and Godot, alongside graphical engines using OGRE and OpenGL. Contributed as both team lead and team member in multiple game jams. Strengthened communication, attention to detail, and teaching skills as a STEM tutor, earning commendations for helping students understand complex concepts.

INDEPENDENT PROJECTS

July 2025

OGRE Solar System Demo – Personal Project

A simulation of the Solar System built in OGRE through C++. Source code visible at https://github.com/John-Busse/OGRE-Projects/tree/main/Solar-System

June 2025

Scooped! Match-ine Malfunction – 2025 Mini Jame Gam #44

A tile-matching puzzle game built in Godot over two days. I worked on programming and media integration. This game won 3rd overall and is playable at https://butterrrrr.itch.io/scooped

EXPERIENCE

December 2022 – Present

Independent Software Developer

Developed several game projects using Unreal Engine, Unity, and Godot, while building simple graphical engines with OGRE and OpenGL; contributed as both team lead and team member across multiple game jams.

July 2018 – May 2023

STEM Tutor – Truckee Meadows Community College, Reno NV – Math and Computer Science.

Tutored STEM subjects by communicating complex concepts clearly and reinforcing comprehension through reexamination, earning multiple commendations from students and coworkers.
